

You could win the Swardman Electra Special 45 Premium 18 Inch Cylinder Mower with Electric Motor

The most modern battery-powered cylinder mower on the market.

The silent revolution in lawn mowers

Swardman with its accu cordless model Electra targets above all those people that are interested in newest technologies and eco-friendly, battery-powered machines that are significantly quieter than classical petrol mowers. At its maximum power, the loudness of Electra will be around 70 dB, which is comparable to a water kettle or typing on a keyboard.

7 times lower operating costs

Due to the absence of an internal combustion engine and a minimal share of moving parts, one of the advantages of Electra is minimal service requirements. To maintain the perfect quality of grass cutting, it is enough to sharpen the reel cartridge once a year. The service will thus be faster and cheaper than that of a petrol-powered machine. The cost of mowing a 350-square yards lawn with Electra is up to 7 times lower compared to a petrol lawnmower.

SPECIFICATIONS

Overall machine width	59 cm (23 in)
Grass catcher capacity	40 L
Noise level at the operator's ear	67 dB
Machine weight	53 kg (with basic battery)
Cut height	4 - 45 mm (0.15 - 2 in) with continuous micro-adjustment
Cylinder	5 blades, 60 cuts per meter (6 or 10 blades on demand)
Mowing speed	0,7 -5,3 km/h (0,4 - 3,3 mph), reverse gear
Motor for cylinder propulsion	Industrial 24 V / 500 W
Motor for drive	Industrial 24 V / 200 W
Charger	230 V; cable length 4 m
Country of origin	Czech Republic
Special features	Multifunctionality 4 in 1 – mower with possibility of transformation into verticutter, scarifier, brush. Special regenerative mode and cruise control.
